The following description of Fig. 6 is a diagram of the two laser beams of different wavelengths emitted from a laser diode of an optical pick-up head and the predetermined signals generated by the two laser beams. a is inserted between [Para 23] and [Para 24].

The following description of Please refer to Fig. 6. Fig. 6 is a diagram of the two laser beams of different wavelengths emitted from a laser diode of an optical pick-up head and the predetermined signals generated by the two laser beams. The laser diode 1 of an optical pick-up head can emit a laser beam of wavelength 780nm and a laser beam of wavelength 650nm. Each laser beam can generate a predetermined signal, like an S-curve,
